MIZZOKKO

Protect knives for long use

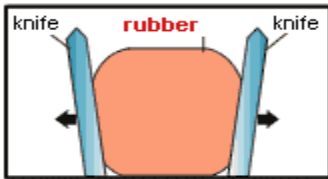

NEW

HOW MIZZOKKO WORKS

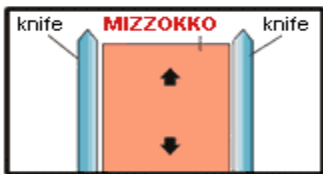

A die-cut cushion made from belt-shape porous rubber with appropriate hardness for the purpose to reduce the pressure in die-cutting process and to protect the cutting knives from damages by the pressure. The unique trapezoid top of the cushion is our original shape.

RUBBER

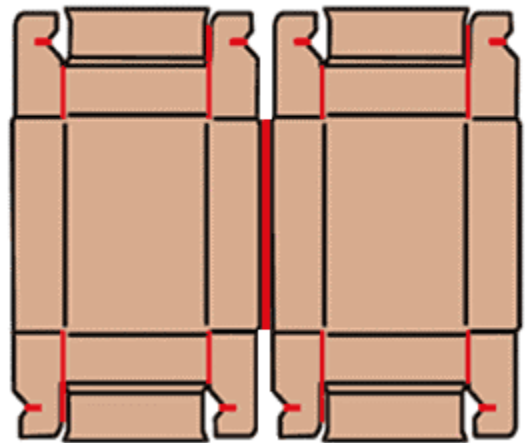

Horizontal pressures make rubber to push knives to damage.

MIZZOKKO

Vertical pressures will not harm knives thanks to MIZZOKKO.

HOW TO USE

● In between multiple patterns

<Specifications>

For Plywood of 18mm thickness

Size: 7.5H x 250L (mm)
